

DPG DEGREE COLLEGE

(Affiliated to MDU, Rohtak)

Sector-34, Near Marble Market, Gurugram 122001

Annexure 7.1.2(B4) **Hazardous Waste Management**

Hazardous Waste Management Rules are notified to ensure safe handling , generation, processing, treatment, package, storage, transportation, use reprocessing, collection, conversion, and offering for sale, destruction and disposal of Hazardous Waste. DPG COLLEGE , like other entities that generate and manage hazardous wastes, is faced with a range of problems. Most of the departments do not generate hazardous waste .

Hazardous chemical or biochemical including Explosives, Gases, Flammable, Liquids., Flammable Solids or Substances., Oxidizing Substances and Organic Peroxides. contagious disease pathogen, patient blood, and radioactive substances are not used in the university campus yet. Ideally, handling, collection, and transportation and proper handling of chemicals begin with understanding the potential hazards related to their use. All stakeholders, especially from Academic Departments and laboratories are responsible for disseminating information on hazardous materials being used in the facility. As the amount of hazardous waste is nil or very negligible amount, there is not facility developed to transport and manage it in proper place.
