Report on India's Semiconductor Mission Event

An awareness program on India's semiconductor mission under the Aatma Nirbhar Bharat initiative was organized by the Research Committee in collaboration with the Department of Physics and IGNOU on March 13, 2024, in seminar hall, DPG Degree College. Students were informed about the objective of this scheme and the prospects of this mission were explored by Dr. Deepika, Head of the Physics Department. Dr. Shama Parveen delivered a lecture titled "Semiconductor: Early to Modern Perspective," wherein she explained the basics of semiconductors and their importance in the current era. Students benefited from this event and are poised for a bright future in the semiconductor age. The event concluded successfully with an online address by our respected Prime Minister, Narendra Modi, where glimpses of the event were shared.
